About Us

We grow up from technology and business in various industry and years of experience. With our latest technology we trying to build a smart ecosystem. This ecosystem will be the core system of our projects.

We are trying to build some products. We will do research to determine what the market needs and continously update the features to help people solve their problems. Our first project is Smart Wallet.

Wallets have a very important role in storing your investments in crypto, as well as having good security to protect your investments.
You cannot maximize profits or minimize losses that will occur on your investment. Another problem is that you cannot always monitor the movement of your investment. Whereas, crypto is very volatile and sensitive to existing issues.

We are trying to solve the current problems that we faced in Crypto Investment.

The Smart Wallet

The Smart Wallet can help you to visualize, monitoring and transfer your crypto assets. You can also import an external wallet and notified you when your investment have reach the limit to stop loss or take profit. So you can maximize profits and minimize losses on your investment.
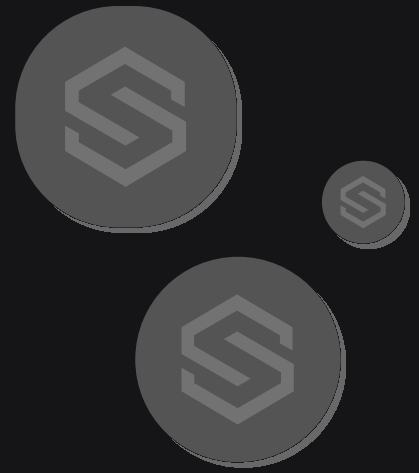

This project will also will give you a better experience on investment and pretend as your investment assistant.
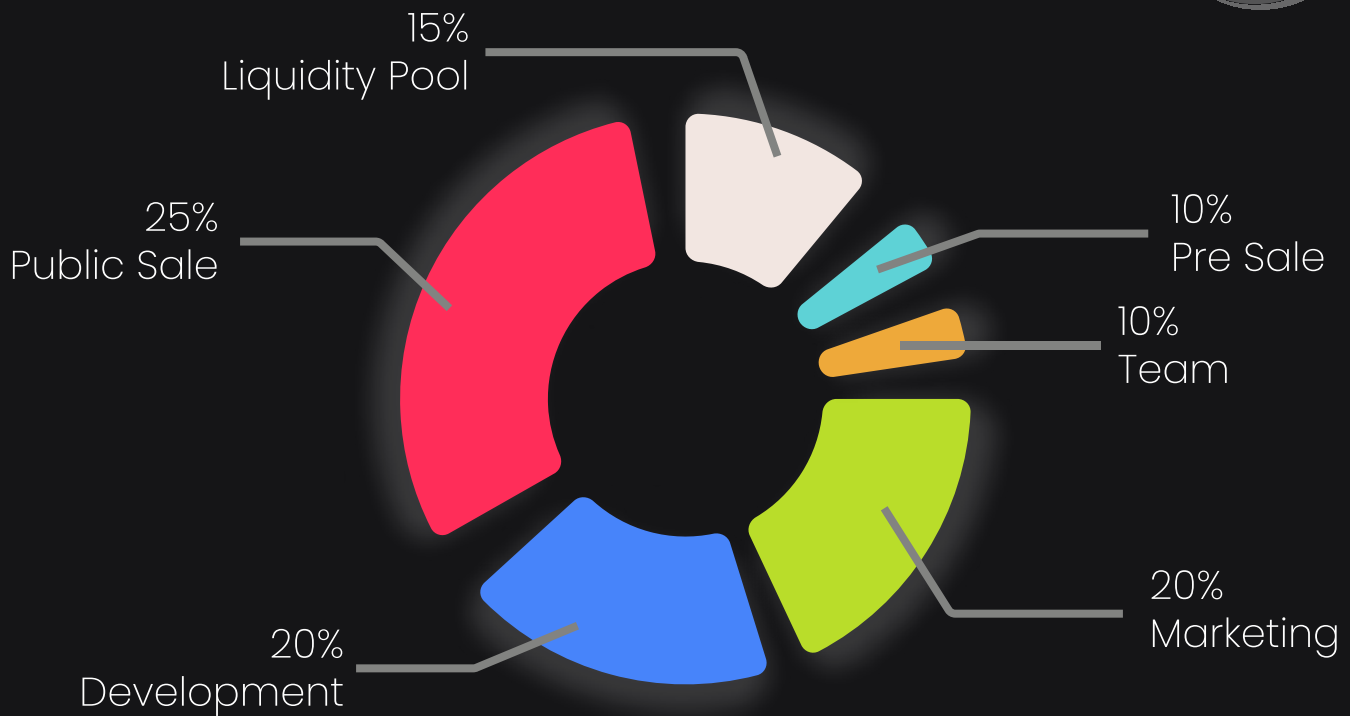

Main Features

- Visualize your crypto assets
- Import External Wallet
- Set reminder limit to stop loss and take profit
- Transfer your crypto assets
- Create new wallet
